

Collection of Urine for Cytology

Patient Preparation

Your doctor may wish you to provide 3 samples over 3 consecutive mornings

In a specimen container:

1. Collect the **complete** SECOND urine specimen of the MORNING.

FOR FEMALES:

Before collecting urine sample, use a sterile water wipe to clean the urethral opening, wiping from front to back. Discard wipe.

2. Specimens should be kept **refrigerated** until taken to your nearest Abbott Pathology Collection Centre (see back of request form for centre locations).

Abbott Pathology, Level 1, 46 Sir Donald Bradman Drive
Mile End, Adelaide, South Australia, 5031.
